Subject: HDSC - Server Hardening

An external consultant has warned us that our servers may not be hardened correctly, and therefore are vulnerable to APT exploits.

Please develop a plan and submit a report on how you will harden each of the servers. In the document, clearly identify the steps you are going to harden the various Linux and Windows systems. After developing the plan, implement it. Please indicate clearly in your document that these tasks have been completed on all machines or details on why you were not able to take appropriate steps at this time.

Thank you.
