Subject: NETW - Firewall Policy

Develop document and implement a FW policy, leveraging the application-layer logic of the Palo Alto firewall as much as possible that:

- 1.) Restricts outbound traffic to expected App-IDs.
- 2.) Appropriately restricting traffic transiting between segments (Public, Internal, and User)
- 3.) Deny all other traffic.
- 4.) Verify that Security Profiles on all permitted traffic flows.

In your response, show a screen shot of the policies in a business memo format.

Thank you.

IT Director
