Subject: AALG - Configure NTP

Team, we really need to have a consistent time on our network so that log entries are properly documented and can be used in court. Human Resources is adamant that actions the Aii AI takes are prosecutable.

Inject Instructions:

- 1) You are to set up one main clock on the network that every machine will be reconfigured to get the time from. clearly identify which device this is in your response.
- 2) Please configure all devices, servers and workstations to get their time from this clock.

Writing a business memo, provide screen shots demonstrating that the time is synced across all machines and devices, including the commands and/or utilities used to accomplish the tasks. Respond with a business memo and required documentation.

Thank you.

Director - Systems Engineering
