Subject: PROC - Disaster Recovery Plan

Internal auditors have noticed we do not have a formal plan for dealing with outages and other catastrophic events.

Develop and submit the following:
1) What would be elements in an effective plan for us that accomplishes the goals of protecting us from data lost, and rapid recovery, given we have the hardware?
2) What tools, products or procedures do we need to accomplish this?

I need these on my desk in an hour to prepare for a meeting with the audit committee from the Aii Board. Be as detailed as you can to give me some ammunition. Respond with a business memo.

Thank you.

IT Security Director
